

Securilog Update Instruction Guide

If Internet Explorer is not your usual browser, in order to provide generic instructions, we advise using it to update. If you are prompted to make Internet Explorer your default browser we suggest selecting no.

1 Go into Start - All programs - Internet Explorer

2 Go to the address bar at the top and type in www.Securilog.co.uk

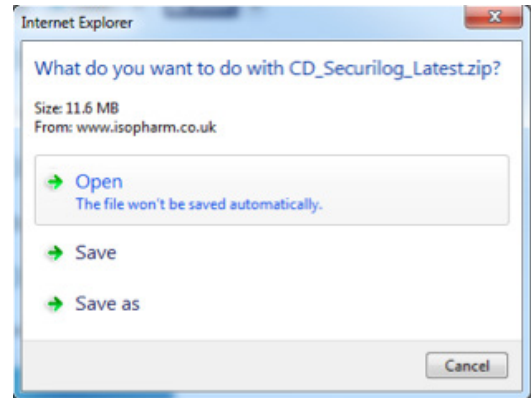

3 Click Download the latest Securilog software at the top

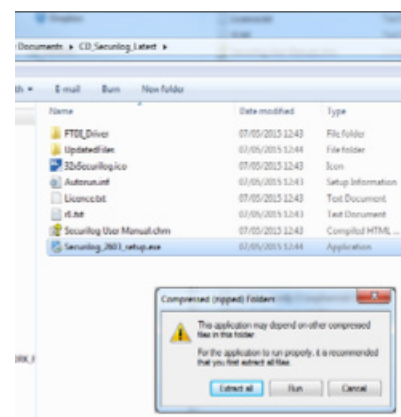

Securilog Software Download

[Download the latest Securilog software](#)

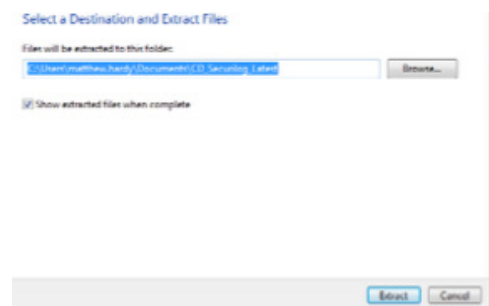

4 It will then begin the download asking if you want to open, save or cancel. Click open and let it download

5 This will then take a minute to download a file and open up a box with several files inside. Double click the file named **Securilog_2603_Setup** and press 'Extract all' when prompted

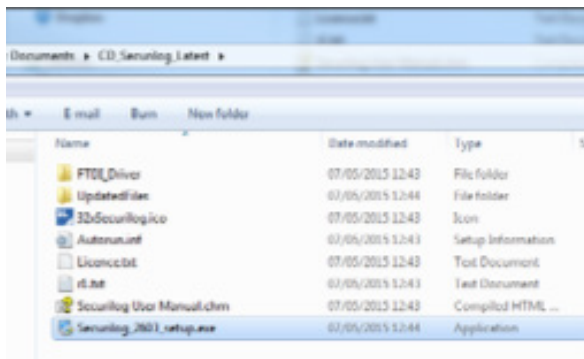

6 Run through the Extraction wizard that opens clicking 'Extract, Next and Finish'

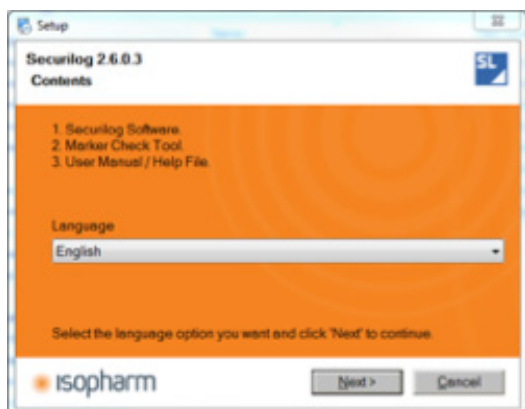

continue over 

- 7** This should then open a box which looks identical to the box before, again double click on the file called '**Securilog_2603_Setup**'

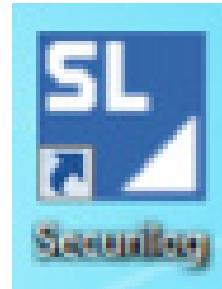

- 8** You should then see the Securilog Software Setup, run through this clicking 'Next, I agree etc'

- 9** This should then install the software and show you the usual screen that you are used to. Import your files as normal and the latest data should show.

- 10** Please note that the Icon has now changed on your Desktop. The old Golden Triangle has been replaced with a blue icon as below, this will open the exact same program and will not delete any old data.
